## A210 Vertical Feeding/Horizontal Labeling System for Vials/Syringes

A system designed with precision, robustness, flexibility, and high-speed in mind for wrap-around labeling on ampoules, vials, test tube and syringes etc.

## Features

- Vertical feeding and horizontal labeling is efficient for solving slender bottles that existing incongruity between feeding and labeling direction.
- The system can be used fully stand alone as well as can be integrated easily into an existing production line for in-line operation.
- Vertical & horizontal collected modes are flexibility chosen.
- Various inspection functions available as options for missed label, missed code or wrong code etc. by machine vision devices or photo-electric devices. Failed bottles upon inspection will be rejected right after labeling.
- New generation bottle-to-tray to put the bottles into carton inner trays right after the labeling process a matching speed.(Optional)
- Optional hot-stamping coder, thermal transfer overprinter, or inkjet coder can be integrated into the system seamlessly. Device status and alarm are reflected in the system.

## Machine Model

## A210

Bottle type & size	1~20ml Ampoule; 7~20ml Vials, test tube Special bottle type: Syringes
Capacity	Ampoule, Vials: 550 pcs./min Syringes: 250pcs./min
Precision	±0.5mm (not including errors from materials or labels)
Machine dimensions	(L)2,844×(W)1,846×(H)1,863 mm
Electricity & power	220V 50Hz 1.4kW

( Custom engineered solutions are available to cater for customer's special needs. )

For continuous improvement on design and product innovations, all specification data are subject to change without prior notice
