Colamark BINGO Vertical Cartoning System

BINGO is designed to meet your present and future cartoning demand. BINGO unloads the cartons from the magazine, opens the carton and closes the bottom by itself. BINGO allows your operators to load the items from top, and closes the top flap afterward. Standard U shape conveyor can accommodate two workers to work together. With extended U shape conveyor, you may also run the machine at higher speed with three to four workers to handle insertions. If you decide to fully automate the process, you may make use of robotic arm to take care of product inserting process. BINGO is flexible to meet most of the industrial cartoning requirements.

Features

- BINGO is easy to adjust, so the changeover time is short.
- The design fits in with the needs of the industrial operations.
- Continuous motion and stepless speed control offer smooth and stable machine operation.
- Highly effective carton pick up and open mechanism have dual suction cups option for tall carton.
- Optional motor driven top cover mechanism can lift up the work station easily, so that change-over process is further simplified.
- JOG switch offers extra benefits for change-overs, trouble shootings or maintenance services.
- Optional anti-scratch treatment on carton transports can reduce scratch on carton.

Model	BINGO
Speed	25 cartons per min & above
Power Consumption	380V 50/60HZ 1.5kW
Compressed air	Consumption : 40NL/min Pressure: 0.6MP
Weight	1,000 Kg
Machine Dimensions	3,210mm L x 1,470mm W x 1,920mm H
